

ABOUT ERCHONIA

Erchonia is a global leader in low-level laser technology and a pioneer in the development of FDA-cleared laser systems. Erchonia Laser therapy delivers precise light energy to targeted tissues.

This light interacts with the body at a cellular level, encouraging natural biological responses associated with:

- Increased cellular energy production
- Reduced pain signaling
- Decreased inflammation
- Improved comfort following procedures

ADVANCING COMFORT, SUPPORTING RECOVERY

While Erchonia lasers are FDA-cleared for pain relief, dental professionals incorporate LLLT as a supportive modality to help manage pain and discomfort associated with a wide range of procedures, including:

- Extractions and wisdom teeth removal
- Periodontal, endodontic, and implant procedures
- Oral, maxillofacial, and jaw surgeries
- Cosmetic and laser-assisted dental procedures
- TMJ/TMD-related discomfort
- Dental trauma and associated neck and shoulder pain

LASER THERAPY

The laser technology used in this practice is FDA-cleared and has been used safely in healthcare for decades.

It supports the body's natural responses rather than forcing change—making it a thoughtful addition to modern dental care.

PRECISION *LIGHT* ELEVATED CARE.

A modern approach to supporting comfort, healing, and patient experience —using low-level laser therapy.

ERCHONIA[®]
Healing Light, Perfected.

WHAT YOU CAN EXPECT

- ✓ Non-invasive
- ✓ No needles
- ✓ No heat
- ✓ No downtime

You may feel a mild warmth or nothing at all. You can return to your normal routine immediately.

Your dentist will guide you on whether laser therapy is appropriate for your individual care plan.

LASER THERAPY FAQs

DOES IT HURT?

No. Laser therapy is gentle and comfortable. Most patients feel nothing at all or describe the experience as relaxing.

WHY WOULD MY DENTIST RECOMMEND IT?

Your dentist may recommend laser therapy to help support comfort after a dental procedure and to promote a calmer recovery experience.

HOW LONG DOES A SESSION TAKE?

Treatments are typically short, often lasting just a few minutes, and can be done right in the dental chair.

WILL I NEED DOWNTIME AFTER TREATMENT?

No. Laser therapy is non-invasive, and you can return to your normal activities immediately.

IS THIS SAFE?

Yes. Erchonia® laser technology used by your dental office is FDA-cleared and has been safely used in healthcare for thirty years.

IS LASER THERAPY RIGHT FOR EVERYONE?

Your dentist will determine if laser therapy is appropriate based on your individual care plan and needs.

IS THIS A REPLACEMENT FOR MY DENTAL TREATMENT?

No. Laser therapy is used as a supportive addition to your dental care—not a replacement for any recommended procedure.

WHY DO DENTAL PRACTICES OFFER THIS TODAY?

Modern dental care focuses not only on treatment—but on the patient experience. Laser therapy helps support comfort, confidence, and peace of mind before and after care.
